PROFESSIONAL SUMMARY

AI & Data Science engineering student with practical, production-level experience in data engineering, statistical data analysis, and machine learning at Eli Lilly and Company. Proficient in Python (Pandas, NumPy), SQL, and data pipeline design following Medallion Architecture. Experienced in building analytics workflows, performing data validation, and extracting insights from large structured datasets. Familiar with core ML concepts and motivated to apply predictive modeling and data science techniques to solve real-world business problems. Certified in Databricks Fundamentals with exposure to Apache Spark and the Lakehouse Platform.

INTERNSHIP EXPERIENCE

Data Engineering Intern | Eli Lilly and Company

Jan 2026 – Jul 2026 | Onsite

- **Data Pipeline Engineering:**

Designed and implemented production-grade ETL pipelines following Medallion Architecture (Bronze, Silver, Gold layers) on large enterprise datasets. Ensured data quality and readiness for downstream analytics and machine learning consumption.

- **Statistical Data Analysis & Feature Engineering:**

Performed exploratory data analysis (EDA) on structured enterprise datasets using Python (Pandas, NumPy). Cleaned, validated, and transformed raw data into analysis-ready feature sets, improving data quality and consistency across reporting pipelines.

- **Analytics & Business Insights:**

Built end-to-end analytics workflows that aggregated and modeled structured datasets to surface actionable business insights. Delivered reports aligned with organizational KPIs, supporting data-driven decisions for cross-functional stakeholders.

- **Scalable Data Architecture:**

Collaborated with engineering teams to architect scalable, modular data workflows in a cloud-connected environment. Applied data warehousing best practices to ensure pipelines were maintainable, performant, and production-ready.

- **Cross-functional Collaboration:**

Partnered with business and technical teams to translate data requirements into engineering solutions. Documented data flows and pipeline logic, enabling seamless knowledge transfer and stakeholder alignment.

PROJECTS

Data Quality & Analytics Pipeline — Enterprise Data | Eli Lilly and Company

Jan 2026 – Jul 2026

- Engineered data transformation and validation pipelines on enterprise-scale structured datasets using Python and SQL, serving as a foundation for BI and analytics workloads.
- Applied statistical data validation techniques to detect anomalies, inconsistencies, and missing values; improved overall dataset reliability for downstream analysis.
- Produced aggregated analytics reports from processed data, enabling stakeholder teams to derive patterns and operational insights from complex datasets.

Generative AI Solution — AWS Bedrock & PartyRock | AWS Generative AI Ideathon

Jan 2025

- Designed and prototyped an AI-powered solution using Amazon Bedrock (large language models) and PartyRock to address a real-world problem statement at a national-level student competition.
- Demonstrated applied understanding of generative AI, prompt engineering, and cloud-based AI services — relevant to modern data science and ML deployment workflows.
- Reached the finalist stage among national-level student innovators, validating the technical quality and business relevance of the solution.

Spring Boot CRUD REST API with MySQL | [GeeksforGeeks Bootcamp](#)

- Built a production-style REST API with full CRUD operations using Spring Boot, MySQL, and JPA, demonstrating understanding of structured data storage, retrieval, and API design relevant to ML model serving.
- Validated all endpoints using Postman, ensuring robust data flow — equivalent to validating model inference endpoints in a production ML system.

TECHNICAL SKILLS

- **Data Science & ML:** Machine Learning Concepts, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Data Analysis, Predictive Modeling Fundamentals, Model Validation Basics
- **Programming:** Python — Pandas, NumPy (Intermediate), SQL (Intermediate), C (Intermediate), Java (Beginner)
- **Data Engineering:** ETL Pipelines, Medallion Architecture (Bronze/Silver/Gold), Data Transformation, Data Validation, Data Cleaning, Data Warehousing, Apache Spark (Fundamentals)
- **Cloud & Platforms:** Databricks (Certified Fundamentals), Delta Lake, AWS Bedrock (Exposure), Cloud Data Platform Exposure
- **BI & Visualization:** Power BI, Tableau, Microsoft Excel (Intermediate)
- **Dev & Collaboration:** Git, Postman, Spring Boot, HTML/CSS/JavaScript

EDUCATION

B.E. — Artificial Intelligence & Data Science | CGPA: 8.66 | GSSS Institute of Engineering and Technology for Women, Mysuru 2022 – 2026

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Statistical Methods, Big Data Analytics, Artificial Intelligence.

Pre-University (Intermediate) | 85.8% | Vijaya Vittala Composite PU College, Mysuru 2022

SSLC | 92.8% | Chaitra High School and PU College, Mysuru 2020

CERTIFICATIONS & TRAINING

- Databricks Fundamentals — Databricks Academy (2026): Lakehouse Platform architecture, Delta Lake, Apache Spark foundations, and data engineering workflows. Aligned with the Databricks Certified Associate Data Engineer path.
- Java Programming — Great Learning (Apr – May 2024): OOP principles, backend application development, and structured programming.
- Web Development — Infosys Springboard (Jun – Jul 2024): Front-end development, responsive design, UI best practices, JavaScript frameworks.

ACHIEVEMENTS

- Finalist, AWS Generative AI Ideathon (Jan 2025): Developed an AI-powered solution leveraging Amazon Bedrock and PartyRock on a real-world problem statement, competing at a national level among student innovators.
