

SHEETAL M V

Full Stack Developer | Java | Spring Boot | React | REST APIs | MySQL

+91 8277939391 | sheetalmv14@gmail.com | [linkedin.com/in/sheetal-m-v](https://www.linkedin.com/in/sheetal-m-v) | Mysuru, Karnataka

PROFESSIONAL SUMMARY

Full Stack Developer with a strong foundation in Java, Spring Boot REST APIs, React, and relational databases (MySQL). Experienced in designing layered backend architectures, building RESTful services, and delivering end-to-end web applications. Complemented by hands-on exposure to Python, SQL, data pipelines, and cloud-connected platforms through a production internship at Eli Lilly and Company. Solid understanding of the Software Development Lifecycle (SDLC), version control with Git, and API testing with Postman. Eager to contribute to engineering teams building scalable, user-facing products.

TECHNICAL SKILLS

- **Languages:** Java (Intermediate), JavaScript (Intermediate), Python (Intermediate), SQL (Intermediate), C (Intermediate), HTML5, CSS3
- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Component-based Architecture
- **Backend:** Spring Boot, REST API Design, JPA / Hibernate, MVC Architecture, Controller-Service-Repository Pattern
- **Databases:** MySQL, Relational Database Design, SQL Queries, Data Modeling
- **Data Engineering:** ETL Pipelines, Medallion Architecture, Data Transformation, Pandas, NumPy, Apache Spark (Fundamentals)
- **Tools & Platforms:** Git, Postman, Databricks (Certified), Power BI, Tableau, Microsoft Excel, VS Code
- **Concepts:** SDLC, OOP, CRUD Operations, API Integration, Data Validation, Database Operations, Machine Learning Basics

PROJECTS

TaskFlow — Full Stack Task Management Application | [React](#) | [Spring Boot](#) | [MySQL](#) | [REST API](#) | [JWT Auth](#)2025

- Built a full-stack task management web application with a React frontend and a Spring Boot backend, implementing user authentication using JWT tokens and role-based access control (Admin / User).
- Designed and implemented 12+ RESTful API endpoints following the Controller-Service-Repository pattern, handling full CRUD operations for tasks, users, and project boards with proper HTTP status codes and error handling.
- Engineered the MySQL database schema with normalized tables for users, tasks, and projects; used JPA/Hibernate for ORM mapping, eliminating manual SQL for routine queries while retaining custom JPQL for complex reports.
- Developed the React frontend with reusable component architecture, state management using React Hooks (useState, useEffect), and dynamic UI updates on API responses — enabling real-time task status changes without page reloads.
- Integrated Axios for REST API calls from the frontend, implemented form validation, loading states, and error boundaries, delivering a production-quality user experience across the full request-response lifecycle.

Tech Stack: React.js, Spring Boot, MySQL, JPA/Hibernate, JWT, Axios, Git, Postman

E-Commerce REST API Backend | [Spring Boot](#) | [MySQL](#) | [JPA](#) | [Postman](#)

2024

- Architected a production-style REST API backend for an e-commerce domain with full CRUD operations covering products, orders, and customers, using Spring Boot, MySQL, and JPA in a layered Controller-Service-Repository pattern.
- Designed normalized relational database schemas in MySQL to handle one-to-many and many-to-many relationships (e.g., orders containing multiple products), demonstrating solid understanding of relational data modeling.
- Validated all API endpoints using Postman — testing request payloads, response codes, edge cases, and error handling — simulating a real QA-driven API development workflow.

Tech Stack: Spring Boot, MySQL, JPA/Hibernate, Postman, Git

Food Delivery Web Application | [Java](#) | [HTML](#) | [CSS](#) | [JavaScript](#) | [MySQL](#)

2023 – 2024

- Developed a fully functional food delivery application covering the end-to-end order lifecycle: user registration, menu browsing, cart management, order placement, and order status tracking.

- Implemented frontend pages using HTML5, CSS3, and JavaScript with responsive design principles, ensuring consistent rendering across desktop and mobile viewports.
- Designed the backend data model and business logic handling order lifecycle state transitions (Placed → Confirmed → Out for Delivery → Delivered), demonstrating grasp of real-world application workflows.

Tech Stack: Java, HTML, CSS, JavaScript, MySQL

AI-Powered Solution — AWS Generative AI Ideathon | *Amazon Bedrock* | *PartyRock* | *Prompt Engineering* Jan 2025

- Designed and prototyped a generative AI solution using Amazon Bedrock (LLMs) and PartyRock to solve a real-world problem statement at a national-level competition, reaching the Finalist stage among student innovators.
- Demonstrated ability to integrate third-party AI APIs into application workflows — a transferable skill directly applicable to full stack development involving LLM or ML API integrations.

INTERNSHIP EXPERIENCE

Data Engineering Intern | *Eli Lilly and Company*

Jan 2026 – Jul 2026 | *Onsite*

- Designed and implemented ETL data pipelines following Medallion Architecture (Bronze, Silver, Gold) on enterprise-scale structured datasets, reinforcing skills in data modeling, transformation logic, and layered system design — directly parallel to backend service architecture in full stack development.
- Performed data cleaning, validation, and preprocessing using Python (Pandas, NumPy) and SQL across large datasets, building strong SQL fluency and data manipulation skills applicable to database-driven web applications.
- Built analytics reporting workflows that aggregated structured data into business-ready insights, demonstrating end-to-end delivery from raw data to consumable output — mirroring the frontend-to-database cycle in full stack.
- Collaborated with cross-functional engineering and business teams to translate requirements into technical solutions, practicing agile communication patterns relevant to sprint-based full stack development teams.

EDUCATION

B.E. — Artificial Intelligence & Data Science | **CGPA: 8.66** | *GSSS Institute of Engineering and Technology for Women, Mysuru* 2022 – 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies, Software Engineering.

Pre-University (Intermediate) | **85.8%** | *Vijaya Vittala Composite PU College, Mysuru* 2022

SSLC | **92.8%** | *Chaitra High School and PU College, Mysuru* 2020

CERTIFICATIONS & TRAINING

- Java Programming — Great Learning (Apr – May 2024): OOP principles, backend application development, project-based assignments covering core Java and Spring fundamentals.
- Web Development — Infosys Springboard (Jun – Jul 2024): Responsive design, UI best practices, and dynamic web application development using JavaScript frameworks.
- Databricks Fundamentals — Databricks Academy (2026): Lakehouse Platform, Delta Lake, Apache Spark, and data engineering workflows.

ACHIEVEMENTS

- Finalist, AWS Generative AI Ideathon (Jan 2025): Developed an AI-powered solution leveraging Amazon Bedrock and PartyRock on a real-world problem statement, competing at a national level.
