PROFESSIONAL SUMMARY

Motivated AI & Data Science engineering student with hands-on Data Engineering experience at Eli Lilly, including Medallion Architecture design, ETL pipeline development, and structured data processing using Python and SQL. Proficient in data transformation, validation, and analytics workflows, with exposure to modern data platform and warehousing concepts. Strong collaborator with the ability to translate business requirements into scalable data solutions. Actively seeking Data Engineering or Data Analyst roles to drive impactful, data-driven outcomes.

INTERNSHIP EXPERIENCE

Eli Lilly and Company

Data Engineering Intern | Onsite | Jan 2026 – Jul 2026

- Designed and implemented data workflows following Medallion Architecture (Bronze, Silver, Gold layers), enabling structured data ingestion, multi-stage transformation, and curated delivery for downstream analytics.
- Built and maintained ETL pipelines for extracting, transforming, and loading structured datasets, improving pipeline reliability and ensuring data readiness for reporting and business intelligence.
- Performed data cleaning, validation, and preprocessing using Python (Pandas, NumPy) and SQL, significantly enhancing data quality, consistency, and accuracy across enterprise datasets.
- Developed SQL queries and database operations to support data extraction and transformation tasks, enabling efficient handling of large structured datasets within a data warehousing environment.
- Created reporting and analytics workflows by processing and aggregating structured datasets, delivering actionable business insights aligned with organizational KPIs and stakeholder requirements.
- Collaborated with cross-functional business and engineering teams to translate requirements into data engineering solutions, supporting data-driven decision-making processes across departments.
- Gained practical exposure to scalable data engineering practices, cloud/data platform tools, and Data Warehousing concepts — applying these to real-world data transformation and pipeline optimization challenges.

PROJECTS

Spring Boot CRUD REST API with MySQL *GeeksforGeeks Bootcamp*

- Architected a production-style REST API with full CRUD operations using Spring Boot, MySQL, and JPA, implementing a layered Controller–Service–Repository pattern for maintainability and scalability.
- Validated all API endpoints using Postman, ensuring robust data flow, consistent error handling, and API reliability across the service layer.

Food Delivery System *Academic Mini Project*

- Developed a fully functional food delivery application with real-world features including order lifecycle management and user workflows, demonstrating end-to-end software delivery skills.

TECHNICAL SKILLS

Data Engineering & Analytics: ETL Pipelines, Medallion Architecture (Bronze/Silver/Gold), Data Transformation, Data Validation, Data Cleaning, Data Warehousing, Data Processing, Analytics Workflows, Power BI, Tableau

Programming & Query Languages: Python (Pandas, NumPy) — Intermediate, SQL — Intermediate, C — Intermediate, Java — Beginner

Web & Application Development: HTML, CSS, JavaScript, Spring Boot (REST APIs), Postman

Tools & Platforms: Microsoft Excel (Intermediate), Git (Basic), Cloud/Data Platform Exposure, Microsoft Word

Core Concepts: Machine Learning Basics, Structured Data Handling, Database Operations, Data Pipeline Design

Soft Skills: Cross-functional Collaboration, Analytical Thinking, Communication, Adaptability, Problem Solving

EDUCATION

GSSS Institute of Engineering and Technology for Women Mysuru, Karnataka

B.E. — Artificial Intelligence & Data Science | CGPA: 8.6 | 2022 – 2026

Vijaya Vittala Composite PU College Mysuru, Karnataka

Pre-University (Intermediate) | 85.8% | 2022

Chaitra High School and PU College Mysuru, Karnataka

SSLC | 92.8% | 2020

CERTIFICATIONS & TRAINING

Java Programming — Great Learning Apr – May 2024 | Remote

- Strengthened core Java programming skills through project-based assignments covering OOP principles and backend application development.

Web Development — Infosys Springboard Jun – Jul 2024 | Remote

- Completed front-end development training covering responsive design, UI best practices, and built a dynamic web application using JavaScript frameworks.

Databricks Fundamentals — Databricks Academy 2025 | Remote

- Earned Databricks Fundamentals accreditation covering core concepts of the Databricks Lakehouse Platform, Delta Lake, Apache Spark fundamentals, and data engineering workflows — aligned with the Databricks Certified Associate Data Engineer path.

ACHIEVEMENTS

- **Finalist, AWS Generative AI Ideathon (Jan 2025):** Developed an AI-powered solution leveraging Amazon Bedrock and PartyRock on a real-world problem statement, competing at a national level among student innovators.

LANGUAGES

English — Full Professional Proficiency | Kannada — Full Professional Proficiency | Hindi — Professional Working Proficiency
