

SHEETAL M V

Software Engineer | Java | Spring Boot | Python | SQL | DSA

+91 8277939391 | sheetalmv14@gmail.com | [linkedin.com/in/sheetal-m-v](https://www.linkedin.com/in/sheetal-m-v) | github.com/sheetalmv | Mysuru, KA

PROFESSIONAL SUMMARY

AI & Data Science engineering student with 6 months of production engineering experience at Eli Lilly and Company. Proficient in Java, Spring Boot REST APIs, Python, SQL, and relational database design. Skilled in building layered backend architectures, writing clean OOP code, and collaborating in agile engineering teams. Familiar with DSA, Git, JUnit, and API testing. Eager to contribute to a strong engineering team as a Software Engineer.

TECHNICAL SKILLS

- **Languages:** Java (Intermediate — primary), Python (Intermediate), SQL (Intermediate), C (Intermediate), JavaScript (Basic)
- **Backend:** Spring Boot, REST API Design, JPA/Hibernate, MVC Architecture, Controller-Service-Repository Pattern, OOP, SOLID basics
- **DSA & CS Fundamentals:** Arrays, Linked Lists, Trees, Graphs, Sorting, Recursion, Hashing, Dynamic Programming — implemented in Java; Big-O analysis
- **Databases:** MySQL, Relational Schema Design, Normalization, Joins, Subqueries, Indexing basics
- **Tools & Practices:** Git, GitHub, Postman, JUnit (unit testing), VS Code, Agile basics, SDLC
- **Data & Cloud:** Python (Pandas, NumPy), ETL Pipelines, Databricks (Certified), Apache Spark (Fundamentals), AWS Bedrock (exposure)

INTERNSHIP EXPERIENCE

Software Engineer Intern — Data Engineering | Eli Lilly and Company

Jan 2026 – Jul 2026 | Onsite

- Designed and implemented production Python pipelines following Medallion Architecture — applying modular design, separation of concerns, and reusable components on enterprise-scale datasets used in live business reporting.
- Wrote optimized SQL and Python (Pandas, NumPy) scripts for extraction, transformation, and validation of large relational datasets — building strong database manipulation and query optimization skills.
- Collaborated with engineers and business stakeholders in an agile environment to translate requirements into working technical solutions, with all code reviewed by senior engineers before production deployment.
- Delivered 6 months of production-level software engineering work in a Fortune 500 company, operating in a real codebase with version control, peer reviews, and stakeholder-facing output.

PROJECTS

AlgoVault — DSA Practice System | Java | OOP | JUnit | Collections | Git

2025

- Implemented 20+ classic data structure and algorithm problems from scratch in Java — linked lists, binary trees, BFS/DFS, dynamic programming, and sorting — each covered with JUnit unit tests validating correctness across edge cases.
- Applied OOP principles throughout: encapsulation, inheritance, and interface-based polymorphism for algorithm strategies. Documented Big-O time/space complexity for every solution, building rigorous algorithmic thinking for technical interviews.

InventoryPro — RESTful Backend Service | Java | Spring Boot | MySQL | JPA/Hibernate | Postman | Git

2024

- Built a production-quality REST API with 15+ endpoints across products, categories, and stock records using Spring Boot and a Controller-Service-Repository architecture. Designed normalized MySQL schema with JPA/Hibernate ORM for complex relationships.
- Implemented @ControllerAdvice global exception handling returning structured JSON error responses (400/404/409/500). Validated all endpoints via a complete Postman collection covering happy paths, edge cases, and failure scenarios.

TaskFlow — Full Stack App | React | Spring Boot | MySQL | JWT Auth | Axios | Git

2025

- Full-stack task management app with React frontend and Spring Boot backend — JWT authentication, role-based access (Admin/User), 12+ REST endpoints, React Hooks state management, and Axios-driven async API integration.

Food Delivery System | Java | HTML | CSS | JavaScript | MySQL

2023

- End-to-end food delivery app covering user registration, menu browsing, cart management, order placement, and order status tracking — demonstrating full software delivery lifecycle from requirement to working product.

EDUCATION

B.E. — Artificial Intelligence & Data Science | CGPA: 8.66 | GSSS Institute of Engineering and Technology for Women, Mysuru 2022 – 2026

Relevant: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, Web Technologies.

Pre-University | 85.8% | Vijaya Vittala Composite PU College, Mysuru 2022

SSLC | 92.8% | Chaitra High School and PU College, Mysuru 2020

CERTIFICATIONS

- Databricks Fundamentals — Databricks Academy (2026): Lakehouse Platform, Delta Lake, Apache Spark, data engineering workflows.
- Java Programming — Great Learning (Apr–May 2024): Core Java, OOP, backend development.
- Web Development — Infosys Springboard (Jun–Jul 2024): HTML5, CSS3, JavaScript, responsive design.

ACHIEVEMENTS

- Finalist, AWS Generative AI Ideathon (Jan 2025): AI-powered solution using Amazon Bedrock and PartyRock — national-level student competition.
- CGPA 8.66 / 10 — Consistent academic excellence across 4 years of AI & Data Science engineering.
